

CartPole: prediction quality needs a decision test

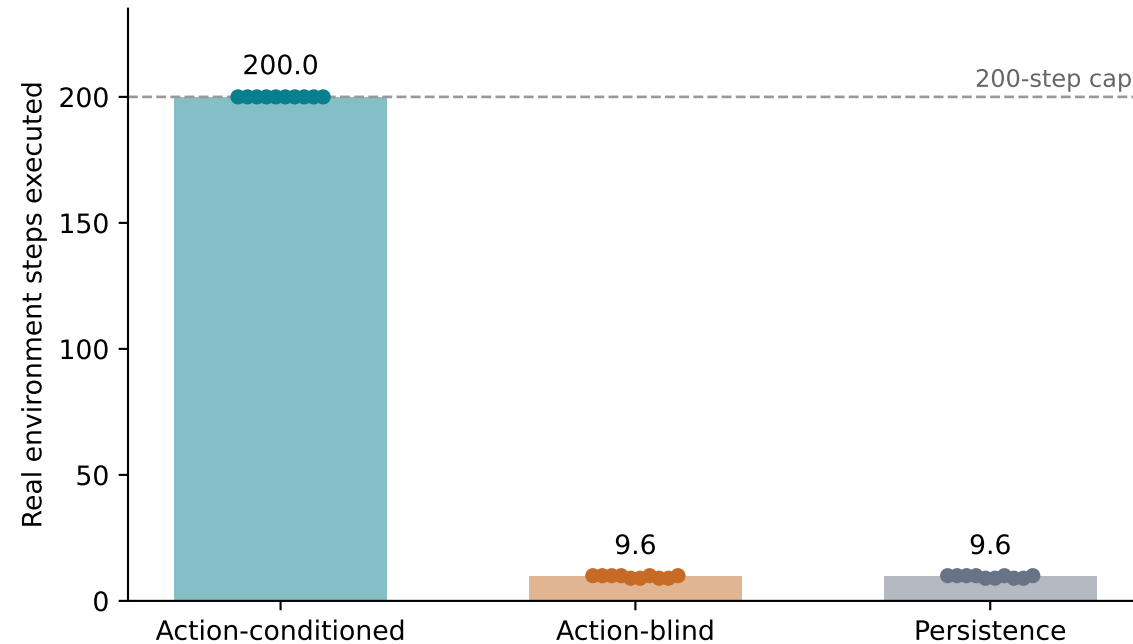

A Same six sources at every horizon

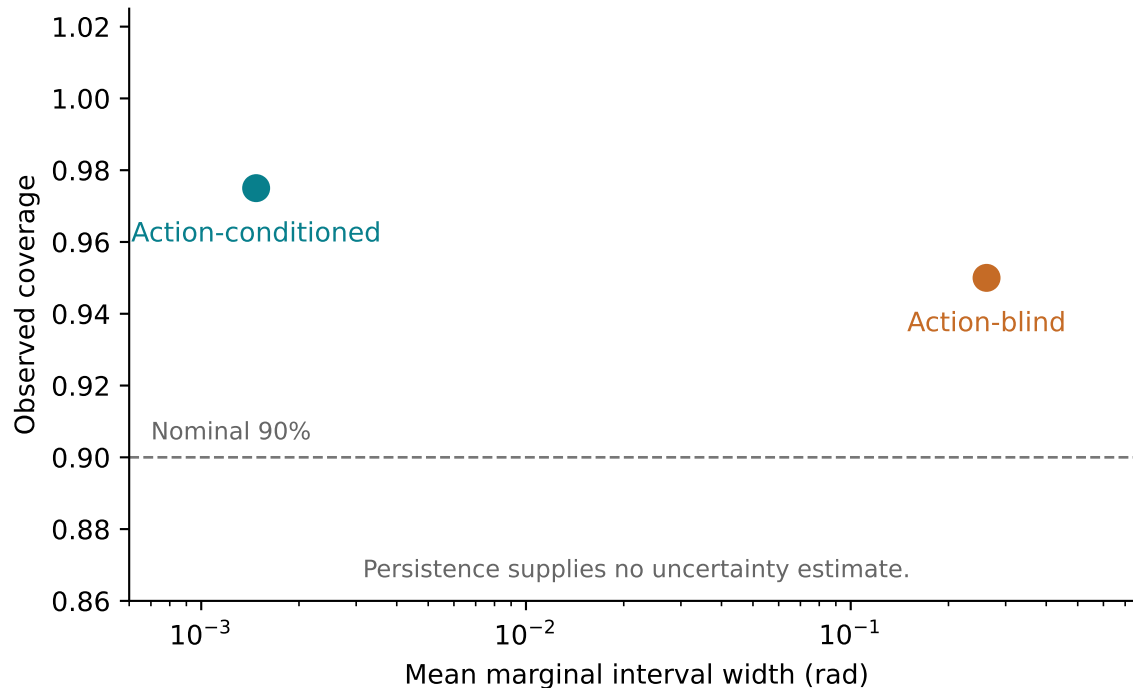

B Action 1 versus action 0 · n = 40 sources

C Same 64-plan search · n = 10 seeds each

D Pole angle at step 8 · n = 40 sources

Frozen Gymnasium study · fully observed states · no video or real-robot claim
A uses only the six trajectories observed through step 32; B-D use the stated source counts.
